## Education

### Ho Chi Minh University Of Technology(HCMUT)

Degree, Concentration. GPA: 3.34/4

Graduation Year: 2026

Grade/Year: 3

Email School: chien.nongminh6604@hcmut.edu.vn

## Technical Skills

**Technical:** JavaScript, TypeScript, Python, MySQL, PostgreSQL, C++, Java

**Frameworks/Platforms:** Next.js, React.js, NestJS, Docker, TypeORM, Node.js, Django, Tailwind

**Database Management System:** MS SQL Server

**Language:** English TOEIC LR 755

## Academic Projects

### "ĐỘI HÌNH CHUYÊN ĐỔI SỐ HCMUT"

( Remote)

**Role: Backend Developer**, 10 Member

6/2024 – 9/2024

- Objective: To develop a web application that streamlines the management of the city's student union, enabling efficient member management, event scheduling, and participation tracking.
- Technologies: Frontend: Next.js | Backend: NestJS | Database: PostgreSQL | TypeORM
- Tools: Gitlab
- Responsibility:
  - Designed and implemented RESTful APIs using Node.js and NestJS, developed features, and optimized the performance of the backend system.
  - Integrated the PostgreSQL database with TypeORM, ensuring data consistency and security.

### eBKStore (Online B2C Transaction Platform)

HCMUT, Project

**Role: FullStack(Leader)**, 5 Member

9/2024 – 12/2024

- Source: [https://github.com/chiencse/electronics\\_store](https://github.com/chiencse/electronics_store)
- Objective: Developed a web-based platform for selling electronic devices, supporting multiple product categories such as computers, phones, and accessories.
- Technologies: Frontend: Next.js | Backend: NestJS | Cloud: Azure | Database: Azure SQL Database | API Documentation: Swagger | TypeORM
- Tools: Git, Google APIs, VNPay API | Docker
- Responsibility:
  - Managed project planning, task allocation. Define the architecture, coding convention, Set up CI/CD with Github Action.
  - Designed and implemented RESTful APIs using NestJS, enabling product management, customer registration, order processing, and payment integration.
  - Integrated VNPay API for secure online payment processing and Google APIs for authentication and geolocation services.
  - Deployed the backend and database on Azure, leveraging Azure SQL for scalable and secure data storage.
