## Education

### Ho Chi Minh University Of Technology(HCMUT)

- GPA: 3.5/4 Graduation Year: 2026
- Course: Achieved A grades in most major and foundation courses.

## Technical Skills

**Program language :** JavaScript, TypeScript, Python, C++, Java, Haskell, Go, Rust

**Frameworks/Platforms:** Next.js, React.js, NestJS, Docker, TypeORM, Node.js, Django, Tailwind, Spring Boot

**Database Management System:** MS SQL Server, MySQL, PostgreSQL, Azure SQL Database, MongoDB, Redis

**Language:** English TOEIC LR 755

## Work Experience

### Agile, Intern Software Development

GeekUp Software Company, Project

**Role: Product Backend,** 5 Member

1/2025 – 5/2025

- Objective: Developed a web-based platform for Manage Connection Employee
- Technologies: ReactJs, NestJS, AWS, Postgres, Swagger, TypeORM
- Tools: Gitlab, Docker, Prometheus, Grafana
- Responsibility:
  - Meeting to Collect and Analyze requirement from customer.
  - Managed project approach flow Agile, planning backlog, sprints, task allocation.
  - Define the architecture with Explicit Architecture, coding convention. Set up CI/CD with Gitlab CI/CD. Build monitoring with Prometheus and Grafana
  - Designed and implemented RESTful APIs using NestJS.

## Academy Project

### SmartRoom (IoT-based Smart Room System)

HCMUT, Project

**Role: Backend Developer,** 3 Member

2/2024 – 5/2024

- Objective: Developed a smart room control system enabling users to remotely manage lighting, air conditioning, and devices using a mobile app.
- Technologies: Spring Boot, Java, React Native, MySQL, MQTT, Swagger, EC2 AWS
- Tools: GitHub, Docker, GitHub Actions, Firebase
- Responsibility:
  - Designed the backend architecture with layered structure and applied best practices for scalable REST APIs.
  - Set up CI/CD pipelines using GitHub Actions to automate backend deployment and testing workflows.
  - Developed RESTful APIs for device control, user authentication, and real-time status updates.
  - Integrated MQTT broker for real-time device communication between mobile app and IoT devices.

## **eBKStore (Online B2C Transaction Platform)**

HCMUT, Project

**Role: FullStack(Leader)**, 5 Member

9/2024 – 12/2024

- Objective: Developed a web-based platform for selling electronic devices, supporting multiple product categories such as computers, phones, and accessories.
- Technologies: Next.js, NestJS, Azure, Azure SQL Database, Swagger, TypeORM, Google APIs, VNPay API
- Tools: Git, Docker
- Responsibility:
  - Managed project planning, task allocation. Define the architecture layer, coding convention, Set up CI/CD with Github Action
  - Designed and implemented RESTful APIs using NestJS, enabling product management, customer registration, order processing, and payment integration.
  - Integrated VNPay API for secure online payment processing and Google APIs for authentication and geolocation services.

## **"ĐỘI HÌNH CHUYỂN ĐỔI SỐ HCMUT"**

HCMUT(Remote)

**Role: Backend Developer**, 10 Member

6/2024 – 9/2024

- Objective: To develop a web application that streamlines the management of the city's student union, enabling efficient member management, event scheduling, and participation tracking.
- Technologies: Next.js, NestJS, PostgreSQL, TypeORM
- Tools: Gitlab
- Responsibility:
  - Designed and implemented RESTful APIs using Node.js and NestJS, developed features, and optimized the performance of the backend system.
  - Integrated the PostgreSQL database with TypeORM, ensuring data consistency and security.

## **Certificate**

- The Scrum Training Course of Axon Active Vietnam
